the new way to hydrate

**Temperature, taste and sustainability
- much more than your average reusable bottle!**

the new way to hydrate

The secret is the interior.

Made with a ceramic coating, the Runbott will not only maintain the temperature of your favourite drink, it will also maintain the flavour.

No metals means no added, unpleasant flavours.

the new way to hydrate

It's so easy to clean.

With just a little tap water, your Runbott will be ready to go again.

the new way to hydrate

**Join us - help the fight
against global warming.**

Like you, we are really
serious about protecting our
environment.

Choose Runbott, help our
planet and say goodbye to
plastic bottles.

1 Powder coating

Highly durable and easy to hold.

2 Vacuum insulation

The vacuum between the walls provides excellent insulation. The temperature on the outside won't affect the temperature on the inside.

3 Food grade stainless steel

BPA-free, highly resistant and also very light.

4 Inner ceramic coating

Enjoy the original flavours of your drinks. No metals means no added, unpleasant flavours.

the new way to hydrate

The facts and figures.

Bottle size: 220 x 70mm

Cap size: 50mm

Capacity: 600ml

Cold water up to 24 hours

Hot water up to 8 hours

Inner ceramic coating

Enjoy the original flavours of your drinks. No metals means no added, unpleasant flavours.

Food grade stainless steel

BPA-free, highly resistant and also very light.

BPA free

BPA is an industrial chemical that may find its way into your food and beverages. No BPA - no chemicals!

Vacuum insulation

The vacuum between the walls provides excellent insulation. The temperature on the outside won't affect the temperature on the inside.
